- 8.14.060 Duty to Remove and Abate Hazardous Vegetation.**
- 8.14.070 Enforcement.**
- 8.14.080 No Duty to Enforce.**
- 8.14.090 Effective Date and Publication.**

8.14.010 Title and Purpose. This chapter shall be known and may be referred to in all proceedings as the County Hazardous Vegetation Management Ordinance. The purpose of the ordinance is to provide for the removal of hazardous vegetation situated in the unincorporated areas of the county so as to reduce the potential for fire and to promote the safety and welfare of the community, including protection of lives, structures, private property, natural resources and the environment.

8.14.020 Findings.

- A. Hazardous Vegetation Management is of paramount importance to the Board of Supervisors for the protection of lives and property from the threat of fire.
- B. Board of Supervisors of the County of Tuolumne (hereinafter "County") finds and declares that the uncontrolled growth and/or accumulation of hazardous vegetation or obstructions on driveway, egress sidewalks, streets, and on lands or lots within the County is dangerous or injurious to neighboring property and the health, safety and welfare of residents of the County. Such growth and accumulation constitute a public nuisance and creates a hazard to the health, safety and general welfare of the public.
- C. It is the intent of the County that this Ordinance shall apply to the abatement of the growth and/or accumulation of hazardous vegetation on all parcels within the

County and to the maintenance of those parcels to prevent regrowth of hazardous vegetation.

- D. The County is located in a wildland urban interface fire area in which many of the native and non-native plant species within the jurisdictional boundaries of the County are highly flammable during dry periods and have created extra hazardous fire conditions and contributed to significant wildfires resulting in catastrophic fires, losses to life, property and the environment.

8.14.030 Definitions.

- A. "Adjacent" means adjoining or having a common boundary.
- B. "Accumulation of Hazardous Vegetation" means hazardous vegetation in such a manner to create a fire hazard.
- C. "Building" means any structure having a roof supported by columns or walls, used or intended to be used for the shelter of or enclosure of persons, animals or property.
- D. "Cultural resource" means any building, structure, object, site, district, or other item of cultural, social, religious, economic, political, scientific, agricultural, educational, military, engineering or architectural significance to the citizens of Tuolumne County, the State of California, or the nation which is 50 years of age or older or has been listed on the National Register of Historic Places, the California Register of Historical Resources, or

- the Tuolumne County Register of Cultural Resources. The term "cultural resource" includes historical resources and historic properties.
- E. "Defensible Space" means the area within the perimeter of a parcel where basic wildland fire prevention practices and measures are implemented and maintained, including but not limited to removing brush, flammable vegetation, or combustible growth that is located from 0 feet to 100 feet from a building or structure measured from the eaves, porches, decks and balconies to the property line, to provide the key point of defense from an approaching wildfire or an escaping structure fire.
- F. "Dwelling" means any building or portion thereof designed or used as the residence of one or more persons.
- G. "Enforcement Officials" means the Tuolumne County Fire Chief or their designee.
- H. "Fire Hazard" means any condition, arrangement, or act which increases the hazard or menace of fire to a greater degree than customarily recognized as normal by persons in the public service of preventing, suppressing or extinguishing fire; or which may obstruct, delay, or hinder, or may become the cause of obstruction, delay or hindrance to the prevention, suppression, or extinguishment of fire.
- I. "Hazardous Vegetation" means any vegetation that is flammable and endangers the public safety by creating a fire hazard including but not limited to seasonal and recurrent weeds, stubble, brush, dry leaves, needles, tumbleweeds, standing dead trees, and under growth vegetation. Hazardous vegetation also includes live or dead vegetation that allows a fire to climb up from the landscape or the forest floor into the tree canopy, and otherwise referred to as "ladder fuels".
- J. "Ladder fuels" means those combustible materials (both live and dead) that provide a path for a surface fire to climb up into the crowns of shrubs or trees. Standing dead trees with many limbs near the ground are an example of ladder fuels.
- K. "Owner" means the owner of a parcel subject to this Chapter, as disclosed in the records of the County Tax Assessor at the time an Opportunity to Correct is given or the Notice and Order is served.
- L. "Parcel" means a lot, unit or tract of private real property created by a division of land which is legally separate from any adjacent property.
- M. "Perennial stream" means a stream channel that carries water the year round, being fed by a fairly stable water flow. May be small or large, however when large, it may be referred to as a river.
- N. "Reduced Fuel Zone" means the area wherein the arrangement of trees, shrubs and other fuel sources is done in such a way that makes it difficult for fire to transfer from one fuel source to another. It does not mean cutting down all trees and shrubs or creating a bare ring of earth across the property, nor does it require the removal of healthy, mature, scenic trees. The following examples are part of the reduced fuel zone:
- Cut or mow annual grass down to a maximum height of 4 inches.
 - Create horizontal space between shrubs and trees.
 - Create vertical space between grass, shrubs and trees.
 - Remove fallen leaves, needles, twigs, bark, cones, and small branches. However, they may be permitted to a depth of 3 inches.
 - Remove standing dead vegetation, including trees and shrubs.

- All exposed wood piles must have a minimum of 10 feet of clearance, down to bare mineral soil, in all directions.
 - All propane tanks must have a 10 feet clearance to bare mineral soil and no flammable hazardous vegetation for an additional 10 feet around their exterior.
- O. "Responsible person" shall mean either of the following: 1.) Any individual or legal entity who is the owner, tenant, co-tenant, lessee, sublessee, occupant or other person with any right to possession of the real property, owner or authorized agent of any business, company or entity, or the parent or the legal guardian of any person under the age of eighteen (18) years, who causes, permits or maintains a violation of this Code, its adopted codes or applicable State codes. 2.) Any individual, legal entity or the parent or the legal guardian of any person under the age of eighteen (18) years, who causes, permits or maintains a violation of this Code, its adopted codes or applicable State codes.
- P. "Riparian area" means the land, plants and animal life bordering a stream, river or lake.
- Q. "Structure" means that which is built or constructed, an edifice or building of any kind, or any piece of work artificially built up or composed of parts joined together in some definite manner and created primarily for purposes other than sheltering human activity.
- R. "Wetlands" means transitional areas between terrestrial and aquatic systems where the water table is usually at or near the surface, or the land is covered by shallow water.

8.14.040 Legal Authority for the County

Ordinance. The County has the legal authority to adopt the provisions contained in this Ordinance as specified below:

- A. The California Health and Safety Code, Division 12, Parts 5-6, Sections 14875-14931, which provides that an accumulation of weeds, grasses, hazardous

vegetation and other combustible material may be declared a public nuisance, and provides guidelines for enforcement and abatement by the County of such nuisance as fire hazards, and payment of such abatement costs incurred by the County to remove such hazardous vegetation and combustible material. This Code also provides for penalties for violations of this Ordinance by property owners.

- B. The California Fire Code Title 24, Part 9, Chapter 3, Section 304.1 prohibits combustible waste material creating a fire hazard on vacant lots or open space, which California Fire Code has been adopted by the County.
- C. The California Code of Regulations Code, 14 C.C.R., Sections 1270.01-1276.03, which establish minimum wildfire protection standards in conjunction with building, construction, and development within the State Responsibility Area (SRA).
- D. The California Public Resources Code Section 4291 which requires a person or entity that owns, leases, controls, operates, or maintains a building or structure in, upon, or adjoining a mountainous area, forest-covered lands, brush-covered lands, grass covered lands, or land that is covered with flammable material, to maintain defensible space of 100 feet from each side and from the front and rear of the structure, and which provides for required fuel modification so as to ensure that a wildfire burning under average weather conditions would be unlikely to ignite the structure on the property.
- E. Government Code Section 25845 and 25845.5 which provide that the Board of Supervisors may establish procedures for the abatement of a nuisance and regarding enforcement mechanisms available for the County to ensure that the costs incurred by the County in abating

the nuisance consisting of accumulation of weeds, grasses, hazardous vegetation and other combustible materials are recovered from the property owner who fails to abate such nuisance after notice from the County to do so.

8.14.050 Prohibited Conduct. No person shall allow or permit the accumulation of hazardous vegetation on that person's property or on any other property so as to constitute a fire hazard in violation of California Public Resources Code, Section 4291, which requires one-hundred (100) feet of defensible space around all dwellings and buildings.

3.50.060 Appeals. Determinations of the Community Resources Director concerning the County Services Impact Fee as provided herein may be appealed to the Board of Supervisors. The appeal shall be submitted to the Community Resources Agency within ten days from the date of the decision and shall set forth in writing the reasons for the appeal. An appeal shall not be considered unless it sets forth the reasons why it is claimed the Director's determination was incorrect. The Community Resources Agency shall immediately forward a copy of the appeal to the Clerk of the Board. The Clerk shall schedule the matter for consideration by the Board within thirty days from the date of appeal and send a notice to the appealing person at least ten days before the meeting. Within forty-five days of receipt of the appeal the Board shall take action on the appeal. Appeals not submitted in a timely manner will not be considered and will be returned.

8.14.060 Duty to Remove and Abate Hazardous Vegetation.

- A. It shall be the duty of every owner and/or responsible person of any parcel within the unincorporated areas of the County to remove hazardous vegetation from driveways, roadways and road easements owned or controlled by the owner and/or responsible person in accordance with the procedures and methods prescribed in this Ordinance and by the enforcement official. The following shall be maintained:
 - 1. Fifteen (15) feet of overhead clearance from the road surface; and
 - 2. Ten (10) feet Reduced Fuel Zone from roadway edge.
- B. Unimproved parcels shall complete a

Reduced Fuel Zone on any portion of the parcel within 100 feet of a building, dwelling, and/or structure on an adjacent parcel.

- C. Where slope, fuel model, environmental factors, the presence of cultural resources, and/or topography make fuel reduction difficult, owners and/or responsible persons may, in lieu of compliance with the provisions of this Ordinance, create a reduced fuel plan approved by the Tuolumne County Fire Chief or designee, which, in his or her discretion, meets the intent of this Ordinance.
- D. Fuel reduction shall not require the removal of healthy, mature, scenic trees; crops, productive vineyards or orchards; or marketable timber; however, it may impose mowing or livestock presence on grasslands, or fire-safe management of crops and forests.
- E. Fuel reduction shall not be required within the bed, bank, or channel of any ephemeral or perennial streams which are mapped on USGS 7.5 minute quadrangle maps; in areas with environmental resources of hazardous or critical concern, including riparian areas and wetlands; or in areas which may cause a substantial adverse change in the significance of a cultural or historical resource.
- F. Fuel reduction shall not be required on slopes greater than thirty percent in grade, as to not result in ground disturbance that could result in sediment delivery to watercourses.
- G. Fuel reduction shall not be required on a site which is included on any list compiled pursuant to Section 65962.5 of the Government Code.
- H. Fuel reduction may be permitted in Open Space zoning, as allowed by Tuolumne County Ordinance Code, Section 17.14.020.B.

8.14.070 Enforcement.

- A. The enforcement official shall have authority to enforce this chapter and issue citations for violations. This Chapter shall be enforced as provided for in Chapter 1.10 of this

Code. Violations of this Chapter are considered violations impacting health and safety and are not subject to the statute of limitations set forth in Chapter 1.10.120. The provisions of this Chapter shall be enforced by the Fire Prevention Division of the Tuolumne County Fire Department.

- B. This ordinance creates minimum rules for hazardous vegetation management in the unincorporated areas of the County. Any legal entity, if it wishes, can adopt and enforce hazardous vegetation management regulations that provide for rules that are more restrictive than the County's.

8.14.080 No Duty to Enforce. Nothing in this Chapter shall be construed as imposing on the County any duty to enforce the provisions of this Chapter, and the County shall not be held liable for failure to enforce this Chapter.

8.14.090 Effective Date and Publication. Shall be from the date of approval.
(Ord. 3428 § 1, 2022)
